CONTENTS

1 **Importance of columnar grains in dictating hot ductility of steels**
B. Mintz, A. Cowley, and R. Abushosha

6 **The θ projection method and low creep ductility materials**
R. W. Evans

9 **Kinetics of cold work embrittlement in rephosphorised, interstitial free steels**
R. D. Misra, G. Weatherly, and D. Embury

14 **Microstructural evolution of Inconel 718 during ingot breakdown: process modelling and validation**
C. A. Dandre, S. M. Roberts, R. W. Evans, and R. C. Reed

26 **Electron backscattering diffraction study of acicular ferrite, bainite, and martensite steel microstructures**
A. F. Gourgues, H. M. Flower, and T. C. Lindley

41 **Ultrasensitive technique for detection of hydrogen emanating from steel and other solid surfaces**
F. W. H. Dean and D. J. Fray

47 **Quantitative characterisation of substructural development during warm working of an interstitial free steel**
G. H. Akbari, C. M. Sellars, and J. A. Whiteman

55 **Mechanisms of inclusion formation in low alloy steels deoxidised with titanium**
C. van der Eijk, Ø. Grong, and J. Walmsley

65 **Development of new material and heat treatment for tools ensuring high performance in hot seamless tube rolling**
K. Tsubouchi, M. Akiyama, and S. Tsumura

73 **Microstructure and tensile properties of $Ni_3(Si,Ti)$ alloys containing second phase dispersions**
T. Takasugi

81 **Tensile strength of fibrous composites at elevated temperature**
Z. M. Huang

95 **Weibull statistical analysis of tensile strength data of short mullite fibre reinforced aluminium alloy composite**
P. Zhao, S. J. Gao, B. L. Shen, and M. J. Tu

99 **Dry sliding wear of TiB_2 particle reinforced aluminium alloy composites**
S. C. Tjong and K. C. Lau

103 **Diffusion bonding of alumina reinforced 6061 alloy metal matrix composite using Al–Li interlayer**
A. Ureña, J. M. Gómez de Salazar, M. D. Escalera, and W. B. Hanson

110 **Study of Ni_3Al–Cr_7C_3 coating fabricated by self-propagating high temperature synthesis casting route**
P. Q. La, M. W. Bai, Q. J. Xue, W. M. Liu, and L. G. Yu

117 **Effect of thermomechanical processing on evolution of superplastic microstructures in Al–Cu–Zr alloys**
N. Ridley, E. Cullen, and F. J. Humphreys

125 **Anomalous silicon segregation in aluminium casting alloy**
L. Snugovsky, J. F. Major, D. D. Perovic, and J. W. Rutter

129 **Precipitation hardening in Inconel 625**
M. A. Shaikh, M. Ahmad, K. J. Shoaib, J. I. Akhter, and M. Iqbal

133 **Anomalous crack shape development (tear drop cracking) in turbine disc material Udimet 720**
M. Loo-Morrey and P. A. S. Reed

147 **Superplastic behaviour of as received superplastic forming grade IN718 superalloy**
B. P. Kashyap and M. C. Chaturvedi

157 **Effect of grain size on grain boundary strengthening of copper bicrystals under cyclic loading**
Z. F. Zhang, Z. G. Wang, and Y. M. Hu

163 **Critical cooling temperatures and phase transformation kinetics in structural steels determined by mean flow stress and dilatometry**
S. F. Medina, M. I. Vega, and M. Chapa

171 **Strain distribution analysis of hot forged seamless pipe fittings**
A. Rodriguez, G. Olvera, P. Fodor, and R. Colás

175 **Theoretical assessment of influence of deformation induced heating on mechanical behaviour at elevated temperatures**
B. Burton

187 **Microstructure and mechanical properties of low alloy steel T11–austenitic stainless steel 347H bimetallic tubes**
X. Gómez and J. Echeberría

L. Snugovsky, J. F. Major, D. D. Perovic, and J. W. Rutter

129 **Precipitation hardening in Inconel 625**
M. A. Shaikh, M. Ahmad, K. J. Shoaib, J. I. Akhter, and M. Iqbal

133 **Anomalous crack shape development (tear drop cracking) in turbine disc material Udimet 720**
M. Loo-Morrey and P. A. S. Reed

147 **Superplastic behaviour of as received superplastic forming grade IN718 superalloy**
B. P. Kashyap and M. C. Chaturvedi

157 **Effect of grain size on grain boundary strengthening of copper bicrystals under cyclic loading**
Z. F. Zhang, Z. G. Wang, and Y. M. Hu

163 **Critical cooling temperatures and phase transformation kinetics in structural steels determined by mean flow stress and dilatometry**
S. F. Medina, M. I. Vega, and M. Chapa

171 **Strain distribution analysis of hot forged seamless pipe fittings**
A. Rodriguez, G. Olvera, P. Fodor, and R. Colás

175 **Theoretical assessment of influence of deformation induced heating on mechanical behaviour at elevated temperatures**
B. Burton

187 **Microstructure and mechanical properties of low alloy steel T11–austenitic stainless steel 347H bimetallic tubes**
X. Gómez and J. Echeberría

194 **Properties of ductile cast iron nodularised with a multiple calcium–magnesium based master alloy**
C. I. Imasogie, A. A. Afonja, and J. A. Ali

202 **Evaluation of induction hardened case depth through microstructural characterisation using magnetic Barkhausen emission technique**
S. Vaidyanathan, V. Moorthy, T. Jayakumar, and B. Raj

209 **Dry sliding wear behaviour at ambient and elevated temperatures of plasma transferred arc deposited aluminium composite coatings**
R. L. Deuis and C. Subramanian

220 **Effect of laser induced rapid solidification structures on adhesion and bonding characteristics of an alumina/silica based oxide to vitreous enamel**
J. Lawrence and L. Li

227 ***Technical note*** **Modification of cast structure in Al–8·3Fe–0·8V–0·9Si alloy by magnesium treatment**
K. L. Sahoo, C. S. Sivaramakrishnan, and A. K. Chakrabarti

231 ***Short communication*** **Low temperature forgeability of Ti–48Al–2Cr–2Nb alloy**
A. Dutta and A. Venugopal Rao

237 ***Overview*** **Potentiometric gas sensors for use at high temperatures**
D. J. Fray

243 **Effect of phosphorus on modification of eutectic silicon in Al–7Si–0·3Mg alloy**
J. H. Kim, I. S. Kwon, K. M. Kim, C. H. Lee, and E. P. Yoon

249 **Structure of Al_3Fe melt at different temperatures under conditions of rapid cooling**
H. Li, X.-F. Bian, S.-J. Yuan, and J.-X. Zhang

255 **Modelled heat transfer coefficients for Al–7 wt-%Si alloy castings unidirectionally solidified horizontally and vertically downwards**
W. D. Griffiths

261 **Modelling microstructural and mechanical properties of ferritic ductile cast iron**
P. Donelan

270 **Microstructural development of Zn–40Al alloy during aging**
X. L. Xu, Z. W. Yu, Y. Huang, Y. Q. Shi, Y. J. Ji, Y. Q. Ma, and Z. K. Hei

275 **Iron–phosphorus–carbon system**
Part 1 – Mechanical properties of low carbon iron–phosphorus alloys
J. W. Stewart, J. A. Charles, and E. R. Wallach

283 **Iron–phosphorus–carbon system**
Part 2 – Metallographic behaviour of Oberhoffer's reagent
J. W. Stewart, J. A. Charles, and E. R. Wallach

291 **Iron–phosphorus–carbon system**
Part 3 – Metallography of low carbon iron–phosphorus alloys
J. W. Stewart, J. A. Charles, and E. R. Wallach

305 **Non-equilibrium intergranular segregation in ultra low carbon steel**
Z. L. Zhang, Q. Y. Lin, and Z. S. Yu

309 **Modelling and determination of dynamic elastic modulus of magnesium based metal matrix composites**
N. Srikanath, D. Saravanaranganathan, M. Gupta, L. Lu, and M. O. Lai

315 **Shear ligament phenomena in Al–Si alloys**
N. M. Mawsouf

321 **Creep kinetics in compression of sand cast commercial Zn–Al alloys**
M. Anwar and S. Murphy

328 **Indentation behaviour and wear resistance of pseudoelastic Ti–Ni alloy**
R. Liu and D. Y. Li

333 **High temperature low cycle fatigue properties of two cast gamma titanium aluminide alloys with refined microstructure**
V. Recina

341 **Evaluating electrical resistivity for high porosity metals**
P. S. Liu and K. M. Liang

344 **Corrosion protection of carbon fibre reinforced aluminium composite by diamondlike carbon coatings**
B. Wielage, A. Dorner, C. Shürer, and J. H. Kim

349 ***Short communication*** **Refinement and characterisation of a thermodynamically stable β[Ni(Al,Ti)]–β'-[Ni_2AlTi]–γ'[$Ni_3(Al,Ti)$] metal–metal composite**
J. D. Robson and H. K. D. Bhadeshia

357 Precipitation characteristics of Cu–15Cr–0·15Zr *in situ* composite
D. L. Zhang, K. Mihara, S. Tsubokawa, and H. G. Suzuki

364 Solute–solute and solute–solvent interactions in transition metal alloys: Pt–Ti system
K. T. Jacob, S. M. Hoque, and Y. Waseda

372 Calculated ternary diagram of Ti–Al–Si system
C. R. de Farias Azevedo and H. M. Flower

382 Effect of aging treatments on microstructure and impact properties of tungsten substituted 2205 duplex stainless steel
Y. S. Ahn and J. P. Kang

389 Damping mechanisms of Fe–Mn alloy with ($\gamma+\varepsilon$) dual phase structure
J.-H. Jun, Y.-K. Lee, and C.-S. Choi

393 Pitting corrosion resistance of as welded and thermally aged nitrogen containing type 316 stainless steel weld metal
U. Kamachi Mudali and R. K. Dayal

399 Effect of phosphorus on stability of cold worked structure in 316Ti austenitic stainless steel
Y. Mandiang, D. Azilinon, M. Adj, and G. Cizeron

408 Low cycle fatigue resistance of Al–Li alloys
N. Eswara Prasad and P. Rama Rao

427 Measurement of fatigue crack plastic zones in fine grained materials using electron backscattered diffraction
A. T. Tucker, A. J. Wilkinson, M. B. Henderson, H. S. Ubhi, and J. W. Martin

431 Tensile properties of thermally exposed aluminium borate whisker reinforced 6061 aluminium alloy composite
W. D. Fei, W. G. Chu, W. Yang, Q. Y. Liu, and C. K. Yao

436 Elevated temperature failure of heat treatment furnace containers
A. J. R. Loureiro and B. F. O. Costa

442 Temperature changes during hot plane strain compression testing
R. J. Hand, S. R. Foster, and C. M. Sellars

451 Directional coarsening of the γ' phase in single crystal nickel based superalloys during tensile creep
S. G. Tian, H. H. Zhou, J. H. Zhang, H. C. Yang, Y. B. Xu, and Z. Q. Hu

457 Effects of flux additions on inclusion removal and microstructure in electron beam button melting of Udimet 720
M. Halali, M. McLean, and D. R. F. West

463 Effects of soft hemispherical particle on local surface stress of hard matrix
C. R. Chen, J. F. Lei, S. X. Li, and J. L. Wen

469 *Short communication* Aging induced deformation and its restoration in copper–beryllium alloy
H. Era, K. Naito, and K. Kishitake

475 *Overview* Overcoming instabilities in aluminium reduction cells: a route to cheaper aluminium
P. A. Davidson

480 Annealing process of fine grained co-stabilised (Y,Mg)-PSZ/$MgAl_2O_4$ ceramics
Y.-L. Ma, X.-B. Sun, and J.-P. Zheng

483 Mathematical modelling of microsegregation in eutectic and peritectic binary alloys
M. A. Martorano and J. T. D. Capocchi

491 Evaluation of hot strip mill backup roll cladding
S. Scandella, S. Atamert, and D. M. Knowles

501 Black oxide layer formation and banding in high chromium rolls
C. S. Li, J. Z. Xu, X. M. He, X. H. Liu, and G. D. Wang

506 Effect of heat treatment on susceptibility of duplex stainless steel to embrittlement by hydrogen
A. A. El-Yazgi and D. Hardie

511 Effect of preform microstructure on hot working mechanisms in ELI grade Ti–6Al–4V: transformed β *v.* equiaxed ($\alpha+\beta$)
Y. V. R. K. Prasad, T. Seshacharyulu, S. C. Medeiros, and W. G. Frazier

517 Hydrogen embrittlement of an HSLA 80 steel in sea water under cathodic charging conditions
K. Banerjee and U. K. Chatterjee

524 Flow curves up to peak strength of hot deformed D2 and W1 tool steels
C. A. C. Imbert and H. J. McQueen

532 Dynamic recrystallisation of D2 and W1 tool steels
C. A. C. Imbert and H. J. McQueen

539 Development of constitutive equations for modelling of hot rolling
S. B. Davenport, N. J. Silk, C. N. Sparks, and C. M. Sellars

547 Mathematical modelling and computer simulation of nitriding
M.-J. Hu, J.-S. Pan, Y.-J. Li, and D. Ruan

551 Creep and stress rupture behaviour of Be/Al composite material Albemet 162
S. G. Song, J. T. Beals, and V. C. Nardone

556 Microstructure and mechanical properties of cast (Al–Si)/SiC_p composites produced by liquid and semisolid double stirring process
M.-C. Gui, D.-B. Wang, J.-J. Wu, G.-J. Yuan, and C.-G. Li

564 Laser surface remelting process of Cu–Cr–Fe contact material
H.-R. Geng, Y. Liu, C.-Z. Chen, M.-H. Sun, and Y.-Q. Gao

568 Recycling of an aluminium based metal matrix composite using disintegrated melt deposition technique
P. S. Ling and M. Gupta

575 Preparation and corresponding structure of nickel foam
P. S. Lui and K. M. Liang

579 Directional solidification of Ni base superalloy IN738LC to improve creep properties
A. Kermanpur, N. Varahraam, E. Engilehei, M. Mohammadzadeh, and P. Davami

593 Eutectoid transformation in Au–39 at.-%In
A. Das, W. Gust, and E. J. Mittemeijer

599 Precipitation of chromium containing dispersoids in Al–Mg–Si alloys
L. Lodgaard and N. Ryum

605 Effect of chromium content on electrical resistivity and tensile properties of Ti–Fe–Cr alloys
M. Ikeda, S. Komatsu, K. Inoue, H. Shiota, and T. Imose

609 Thermoplastic shear localisation in titanium alloys during dynamic deformation
Y. B. Xu, L. Liu, J. Q. Yu, L. T. Shen, and Y. L. Bai

612 Thermally and stress induced changes in three phase structure of Cu–Zn–Al–Fe shape memory alloy
L. G. Bujoreanu, M. L. Craus, S. Stanciu, and V. Dia

617 Assessment and modelling of isothermal forging of intermetallic compounds: Part 2 – Ti_3Al
J. C. F. Millett, J. W. Brooks, and I. P. Jones

625 Carbon composition and temperature dependence of relative change in length during isothermal decomposition of Fe–C austenite
C.-M. Li, F. Sommer, and E. J. Mittemeijer

630 Application of Koistinen and Marburger's athermal equation for volume fraction of martensite to diffusional transformations obtained on continuous cooling of 0·13%C high strength low alloy steel
E. A. Wilson and S. F. Medina

635 Influence of strain rate on recrystallisation–precipitation interaction in V, Nb, and V–Ti microalloyed steels
S. F. Medina and A. Quispe

643 Quantitative research on effects of stresses and strains on bainitic transformation kinetics and transformation plasticity
C. C. Liu, K. F. Yao, and Z. Liu

648 Effect of thermomechanical treatment parameters on mechanical properties of duplex ferrite–martensite structure in dual phase steel
A. K. Panda, P. K. Ray, and R. I. Ganguly

657 Quantitative phase analysis of duplex stainless steel using incomplete pole figures
J. T. Bonarski, M. Wróbel, and K. Pawlik

664 Plastic flow of aluminium extruded under complex conditions
W. Bochniak and A. Korbel

670 Application of model for work hardening behaviour of SiC reinforced magnesium based metal matrix composites
M. Manoharan, M. Gupta, M. O. Lai, and D. Saravanaranganathan

675 High strain rate superplasticity in powder metallurgy aluminium alloy 6061 + 20 vol.-%SiC_p composite with relatively large particle size
W. J. Kim. Y. S. Lee, S. J. Moon, and S. H. Hong

681 Gravity casting processing of brake discs: use of partially recycled (Al–Si–Mg)/SiC_p composite
C. Badini, M. La Vecchia, P. Fino, and P. Cobelli

687 Finite element method simulation of residual stresses in Al_2O_3–AISI 304 steel joints
D. N. Travessa, M. Ferrante, and G. den Ouden

692 Simulation of inelastic response of multidirectional laminates based on stress failure criteria
Z. M. Huang

699 Flow transitions in vacuum arc remelting
P. A. Davidson, X. He, and A. J. Lowe

712 **Low temperature processing of NiZn ferrite by citrate precursor method and study of properties**
A. Verma, T. C. Goel, and R. G. Mendiratta

716 ***Short communication*** **Effects of tantalum addition on transformation behaviour of $(Ni_{51}Ti_{49})_{1-x}Ta_x$ and $Ni_{50}Ti_{50-y}Ta_y$ shape memory alloys**
J. L. Ma and K. H. Wu

Papers from the conference 'Metal matrix composites VII'

723 **Editorial**

725 **Metal matrix composites for aeroengines**
J. A. Hooker and P. J. Doorbar

732 **Beryllium metal matrix composites for aerospace and commercial applications**
T. Parsonage

739 **'Assessment of metal matrix composites for innovations': a thematic network within EU framework 4**
H. Degischer and P. Prader

743 **Development of low cost metal matrix composites for commercial applications**
J. Goñi, I. Mitxelena, and J. Coleto

747 **Processing, microstructure, and physical properties of interpenetrating Al_2O_3/Ni composites**
D. E. Aldrich, Z. Fan, and P. Mummery

753 **Production of a titanium particulate metal matrix composite by mechanical milling**
T. M. T. Godfrey, P. S. Goodwin, and C. M. Ward-Close

759 **Superplastic forming behaviour and post-forming mechanical properties of aluminium based SiC_p reinforced metal matrix composites**
C. M. Styles

765 **Correlation between manufacturing conditions and properties of carbon fibre reinforced magnesium**
H. Capel, S. J. Harris, P. Schulz, and H. Kaufmann

769 **Rotation cylinder manufacturing method and investment casting of SiC_p/AZ91HP magnesium composites**
S. K. Kim, J. I. Youn, and Y. J. Kim

776 **Novel polymer–metal based method for open cell metal foams production**
Z. X. Guo, C. S. Y. Jee, N. Özgüven, and J. R. G. Evans

781 **Influence of processing conditions on morphology of metal foams produced from metal powder**
C. Körner, F. Berger, M. Arnold, C. Stadelmann, and R. F. Singer

785 **Characterisation of impact response of metallic foam/ceramic laminates**
A. E. Markaki and T. W. Clyne

792 **Behaviour of aluminium foam under uniaxial compression**
B. Kriszt, B. Foroughi, K. Faure, and H. P. Degischer

797 **Simulation and quantitative assessment of finite-size particle distributions in metal matrix composites**
N. Yang, J. Boselli, P. J. Gregson, and I. Sinclair

806 **Influence of microstructure on axial strength of unidirectional continuous fibre reinforced aluminium matrix composites**
S. Long, O. Beffort, H. M. Flower, and L. You

811 **Thermomechanical behaviour of a copper–chromium *in situ* composite**
K. L. Lee, H. E. Caroll, and A. F. Whitehouse

817 **Effects of high temperature mechanical damage on physical properties of unidirectional Ti/SiC metal matrix composite**
B. Roebuck, R. Morrell, and P. M. Mummery

825 **Influence of aqueous salt environments on fatigue response of SiCp reinforced aluminium alloys**
M. R. Bache, W. J. Evans, A. J. Shakesheff, J. Shields, and I. Uygur

830 **Fatigue behaviour of aluminium matrix composites reinforced with continuous alumina fibres**
M. Jacquesson, M. H. Vidal-Sétif, R. Valle, N. Godin, A. Girard, and R. Fougères

837 **Analysis of Al/Al_2O_3 metal matrix composites under biaxial cyclic loading using a digital image based finite element method**
J. D. Wolodko, Z. Xia, and F. Ellyin

843 **Kinetic modelling of binder burnout for optimisation of slurry–powder manufacturing process of Ti/SiC composites**
Z. Shi, Z. X. Guo, and J. H. Song

848 **Micromechanical modelling of layered systems containing titanium alloy and titanium MMC subjected to bending**
M. M. Aghdam, D. J. Smith, and M. J. Pavier

853 **Development of light composite materials with low coefficients of thermal expansion**
M. E. Smagorinski and P. G. Tsantrizos

862 **Development of a powder coated fibre pre-processing route for production of fibre reinforced composites**
N. R. F. Beeley and Z. X. Guo

867 **Role of Mg and Mg+Si as external dopants in production of pure Al–SiC metal matrix composites by pressureless infiltration**
A. Zulfia and R. J. Hand

873 **Effect of Al_2O_3 particulates as reinforcement in age-hardenable aluminium alloy composites**
C. A. Mitchell and A. M. Davidson

877 **Rheological behaviour and fluidity of SiC_p+AZ91HP magnesium composites**
S. K. Kim and Y. J. Kim

882 **Charpy impact behaviour of Sigma fibre reinforced titanium composites**
M. P. Thomas

887 **Microstructure evolution and semisolid forming of SiC particulate reinforced AZ91HP magnesium composites**
T. W. Hong, S. K. Kim, H. S. Ha, M. G. Kim, D. B. Lee, and Y. J. Kim

893 **Particle reinforced AA 6061 and A359 aluminium alloys under cyclic thermal loading conditions**
P. Prader and H. P. Degischer

897 **Hot deformation behaviour of aluminium alloy 6061/SiC_p MMCs made by powder metallurgy route**
B. L. Zhang, M. S. Maclean, and T. N. Baker

903 **Novel MMC microstructures prepared by melt infiltration of reticulated ceramic preforms**
H. X. Peng, Z. Fan, and J. R. G. Evans

908 **MMCs with controlled non-uniform distribution of submicrometre Al_2O_3 particles in 6061 aluminium alloy matrix**
Z. Zhou, H. X. Peng, Z. Fan, and D. X. Li

913 **Microstructure and mechanical properties of *in situ* Al–Mg_2Si composites**
J. Zhang, Z. Fan, Y.-Q. Wang, and B. L. Zhou

919 **Property gradation for modification of response of rotating MMC discs**
J. F. Durodola and O. Attia

925 **Mechanical properties of high performance lightweight steels**
Z. Kulikowski, A. Wisbey, T. M. T. Godfrey, P. S. Goodwin, and H. M. Flower

929 **Behaviour of core materials during resin transfer moulding of sandwich structures**
A. Al-Hamdan, M. Al-Ajloni, M. AlHusein, C. D. Rudd, and A. C. Long

935 **Adaption of density distribution for optimising aluminium foam structures**
T. Daxner, F. G. Rammerstorfer, and H. J. Böhm

---

945 *Overview* **Development of robust processing routes for powder metallurgy high speed steels**
C. S. Wright, A. S. Wronski, and I. Iturriza

958 *Overview* **Polishing techniques for optical grade sapphire**
T. S. Sudarshan and R. Radhakrishnan

961 **Computer prediction of microsegregation in peritectic alloy systems**
A. A. Howe and D. H. Kirkwood

968 **Experimental study of Bi–Cd–In phase diagram using conventional methods plus quenching and 'solidification path' techniques**
L. Snugovsky, D. D. Perovic, and J. W. Rutter

979 **Microstructures formed by directional solidification of two ternary eutectic alloys of Bi–Cd–In system**
L. Snugovsky, D. D. Perovic, and J. W. Rutter

984 **Phase relationships involving TiC and Ti_3AlC (P-phase) in Ti–Al–C system**
S. Riaz, H. M. Flower, and D. R. F. West

993 **Partitioning of titanium during the solidification of aluminium alloys**
M. A. Easton and D. H. StJohn

1001 **Electron microscopical investigation of as cast AZ91D alloy**
A. A. Kaya, P. Uzan, D. Eliezer, and E. Aghion

1007 **Investigation into refractories as crucible and mould materials for melting and casting γ-TiAl alloys**
J. P. Kuang, R. A. Harding, and J. Campbell

1017 **Effect of thermal cycling on martensitic transformation temperatures in Ti–Ni–Cu shape memory alloys**
T. H. Nam, G. S. Ha, H. W. Lee, and S. G. Hur

1023 **Evolution of Fe–Co rich particles in Alnico 8 alloy thermomagnetically treated at 800°C**
W. G. Chu, W. D. Fei, X. H. Li, D. Z. Yang, and J. L. Wang

1029 **Hot deformation mechanisms in Ti–6Al–4V with transformed β starting microstructure: commercial *v.* extra low interstitial grade**
Y. V. R. K. Prasad, T. Seshacharyulu, S. C. Medeiros, W. G. Frazier, and J. C. Malas III

1037 **Effect of anisotropy in commercial purity titanium on deep drawability at elevated temperatures**
J.-M. Liu and S.-S. Chou

1041 **Assessment and modelling of isothermal forging of intermetallic compounds Part 3 – Ni_3Al**
J. C. F. Millett, J. W. Brooks, and I. P. Jones

1049 **Dynamic materials modelling concepts applied to analysis of hot rolling of commercial aluminium alloys**
E. S. Puchi Cabrera, C. Villalobos Gutiérrez, and G. Castro Fariñas

1057 **Structural characteristics of $M_{23}C_6$ formed in chromised coatings on 11%Cr steels**
A. R. Castle and D. R. Gabe

1067 **Shot peening of plasma nitrided steel for fretting fatigue strength enhancement**
B. X. Li, Y. Sun, and T. Bell

1073 ***Short communciation*** **Effects of alloying elements on properties and microstructures of Ti–V–Cr burn resistant alloys**
Y. Q. Zhao, K. Y. Zhu, H. L. Qu, H. Wu, and X. M. Zhao

1079 ***Literature review*** **Processing and properties of mild interstitial free steels**
S. Hoile

1095 **Grain refinement of high purity aluminium by asymmetric rolling**
Q. Cui and K. Ohori

1102 **Creep in polycrystalline aluminium**
C. L. Briant and D. L. Davidson

1112 **Interactions between precipitation and recrystallisation in an Al–Mg–Si alloy**
S. J. Lillywhite, P. B. Prangnell, and F. J. Humphreys

1121 **Effect of instability of TiC particles on grain refinement of Al and Al–Mg alloys by addition of Al–Ti–C inoculants**
M. Vandyoussefi, J. Worth, and A. L. Greer

1129 **Diffusion of chromium in ferritic and austenitic 9–20 wt-% chromium steels**
Zs. Tökei, K. Hennesen, H. Viefhaus, and H. J. Grabke

1139 **Innovative surface microcracking treatment of polymeric substrate to be coated with plasma sprayed stainless steel**
S. Hédacq, F. Borit, V. Guipont, and M. Jeandin

1149 **Statistical and probabilistic modelling of uniaxial creep life of a Ti-6246 alloy**
M. Evans and A. R. Ward

Papers from the conference 'Quantitative microscopy of high temperature materials'

1159 **Editorial**

1160 **Quantitative aspects of grain size measurement**
J. Muirhead, J. Cawley, A. Strang, C. A. English, and J. Titchmarsh

1167 **Measurement of grain size and size distribution in engineering materials**
B. Roebuck

1175 **Statistical prediction of inclusion sizes in clean steels**
H. V. Atkinson, G. Shi, C. M. Sellars, and C. W. Anderson

1181 **Development of precipitate size and volume fraction of niobium carbonitrides in stabilised stainless steel**
J. Källqvist and H.-O. Andrén

1187 **A brief review of quantitative aspects of electron energy loss spectroscopy and imaging**
R. Brydson

1199 **Atom probe characterisation of high temperature materials**
R. C. Thomson and M. K. Miller

1207 **Compositional changes in minor phases present in 12CrMoVNb steels during thermal exposure at 550°C and 600°C**
V. Vodarek and A. Strang

1214 **Creep damage quantification of a 2·25Cr–1Mo steel using scanning electron microscopy**
R. A. Collington, J. Cawley, and S. R. Holdsworth

1221 **Quantification of precipitates in a 10%Cr steel using TEM and EFTEM**
P. Hofer, H. Cerjak, and P. Warbichler

1226 **Influence of heat treatments on microstructural parameters and mechanical properties of P92 steel**
P. J. Ennis, A. Zielińska-Lipiec, and A. Czyrska-Filemonowicz

1233 **Development of de-alloyed zones during oxidation: effects on microstructure and spallation behaviour**
S. Osgerby

Papers from 'Structure of materials'

1237 **Introduction**

1238 **Editorial**

1239 **Development of fine grained structures using severe plastic deformation**
Z. Horita, M. Furukawa, M. Nemoto, and T. G. Langdon

1246 **Microstructural evolution during the formation of ultrafine grain structures by severe deformation**
J. R. Bowen, P. B. Prangnell, and F. J. Humphreys

1251 **Processing to ultrafine grain structures by conventional routes**
A. Gholinia, F. J. Humphreys, and P. B. Prangnell

1256 **Structural and mechanical properties of AA 5083 processed by ECAE**
L. Dupuy, J. J. Blandin, and E. F. Rauch

1259 **Effect of grain size on tensile behaviour of a submicron grained Al-3 wt-%Mg alloy produced by severe deformation**
J. S. Hayes, R. Keyte, and P. B. Prangnell

1264 **Ultrafine grained steels: industrial prospects**
A. A. Howe

1267 **Processing of steel for ultrafine ferrite grain structures**
R. Priestner and A. K. Ibraheem

1273 **Ultrafine ferrite formation during hot strip rolling**
P. J. Hurley, G. L. Kelly, and P. G. Hodgson

1277 **Acicular ferrite microstructure in titanium bearing low carbon steels**
J.-Y. Suh, J.-S. Byun, J.-H. Shim, Y.-J. Oh, Y. W. Cho, J.-D. Shim, and D. N. Lee

1282 **Role of silicon in influencing strength and impact behaviour of ferrite and its likely inflence at ultrafine grain size**
B. Mintz

1287 **Critical review of mechanism of superplastic deformation in fine grained metallic metals**
R. I. Todd

1295 **Critical reinforcement size for cavity nucleation during superplastic deformation of metal matrix composites**
H. Iwasaki, H. Hosokawa, M. Mabuchi, and K. Higashi

1299 **X-ray microtomography of cavity coalescence during superplastic deformation of an Al–Mg alloy**
C. F. Martin, C. Josserond, J. J. Blandin, L. Salvo, P. Cloetens, and E. Boller

1302 **Superplasticy and production of mechanically milled Ti–6Al–4V–0·5B**
T. M. T. Godfrey, A. Wisbey, A. Brown, R. Brydson, and C. Hammond

1309 **Superplastic behaviour of Inconel 718 sheet**
Y. Huang, M. Strangwood, and P. L. Blackwell

1314 **Application of superplasticity in commercial magnesium alloy for fabrication of structural components**
T. Mukai, H. Watanabe, and K. Higashi

1320 **High strain rate superplasticity in Japan**
K. Higashi

1330 **Achieving superplasticity at high strain rates using equal channel angular pressing**
M. Furukawa, Z. Horita, M. Nemoto, and T. G. Langdon

1334 **Development of a high strain rate superplastic Al–Mg–Zr alloy**
R. Grimes, R. J. Dashwood, A. W. Harrison, and H. M. Flower

1340 **High strain rate superplasticity in microcrystalline and nanocrystalline materials**
S. X. McFadden, A. V. Sergueeva, R. S. Mishra, and A. K. Mukherjee

1345 **Functionalising nanocrystalline TiO_2 films: dye sensitised solar cells and optical biosensors**
J. R. Durrant, J. Nelson, and D. R. Klug

1349 **Opportunities and pitfalls in the characterisation of nanoscale features**
W. M. Rainforth

1356 **Chemical routes to nanostructured materials**
H. Schmidt

1359 **Editorial**

1360 **Deformation and recrystallisation studied by EBSP: breakthroughs and limitations**
D. Juul Jensen

1364 **Analysis of cellular microstructures in Al–Fe–Si alloy**
J. M. Feppon and W. B. Hutchinson

1367 **Hot deformation and annealing of cube oriented aluminium single crystals**
Y. Huang, F. J. Humphreys, and M. Ferry

1372 **Grain boundary and fracture surface analysis of Fe–P–C steel**
O. Williams, V. Randle, P. Spellward, and J. Cowan

1376 **Microstructure and microtexture of ultrafine ferrite formed in 0·1%C steel using new strip rolling process**
P. J. Hurley, B. C. Muddle, and P. D. Hodgson

1380 **Application of electron backscattered diffraction and crystal orientation mapping to recrystallisation studies in high strength interstitial free steels**
I. J. Cross, V. Randle, and S. R. Daniel

1384 **Measurement of macrotexture by automated crystal orientation mapping: an alternative to X-ray diffraction**
R. A. Schwarzer

1389 **Discrimination and mapping of phase distributions by automated crystal orientation measurement**
R. A. Schwarzer, A. K. Singh, and J. Sukkau

1393 **Electron back scattered diffraction analyses combined with environmental scanning electron microscopy: potential applications for non-conducting, uncoated mineralogical samples**
S. M. Habesch

1399 **Effect of thermomechanical processing on grain boundary character distribution in α-brass**
H. Davies and V. Randle

1403 **Editorial**

1404 **Mechanically alloyed metals**
H. K. D. H. Bhadeshia

1412 **Modelling microstructural evolution and mechanical properties of austempered ductile iron**
R. C. Thomson, J. S. James, and D. C. Putman

1420 **Modelling of non-equilibrium solidification in ternary alloys: comparison of 1D, 2D, and 3D cellular automaton–finite difference simulations**
D. J. Jarvis, S. G. R. Brown, and J. Spittle

1425 **Simulation of microsegregation and microstructural evolution in directionally solidified superalloys**
B. Böttger, U. Grafe, D. Ma, and S. G. Fries

1429 **Computational phase studies in commercial aluminium and magnesium alloys**
H. J. Seifert, P. Liang, H. L. Lukas, F. Aldinger, S. G. Fries, M. G. Harmelin, F. Faudot, and T. Jantzen

1434 **Thermodynamic calculations for precipitation in maraging steels**
W. Sha

1437 **Application of novel technique to examine thermomechanical processing of near β alloy Ti–10V–2Fe–3Al**
M. Jackson, R. J. Dashwood, L. Christodoulou, and H. M. Flower

1445 **Effect of top and bottom filling on reliability of investment castings in Al, Fe, and Ni based alloys**
M. Cox, M. Wickins, J. P. Kuang, R. A. Harding, and J. Campbell

1453 **Mechanical and microstructural behaviour of a particulate reinforced steel for structural applications**
Z. Kulikowski, T. M. T. Godfrey, A. Wisbey, P. S. Goodwin, F. Langlais, H. M. Flower, J. G. Zheng, and D. P. Davies

1465 **Importance of interface chemistry in hipping diffusion bonding of precipitation hardened martensitic stainless steel**
M. A. Ashworth, R. M. Greenwood, M. H. Jacobs, S. Davies, and G. R. Armstrong
